SEEBURGER Cloud Services

Faster response time with SEEBURGER Cloud Services

GNUTTI CARLO GROUP, a global organization with a remarkable experience in the development and production of components for engines and a significant presence in Europe, in North America and in Asia, has implemented an ambitious B2B digital project in an evolving scenario.

The plan started in 2013 with an international B2B consolidation project, followed by an EDI integration project of Ljunghäll Group, with the aim of reaching the standardization in EDI processing and optimizing synergies with a fast response time and with a level of service in line with the Business needs.

Thanks to SEEBURGER, all international EDI/B2B activities, which previously were managed with a set of different solutions, have been consolidated and managed into SEEBURGER datacenter in Germany.
